Why this workshop matters

From the VMA vILT brief

- VMware customers are re-evaluating platform strategy
- OpenShift Virtualization is a credible landing zone
- A Virtualization Migration Assessment opens the motion
- Many teams need stronger technical positioning skills
- Partners help deliver the first assessment on-site

Welcome

Technical workshop · vILT 2026

- Facilitator: Alfred Bach · Red Hat EMEA Partner Program and Development
- Quick intros and shared goals for Day 1–2
- Use chat for questions; we will pace breaks as planned
- Hands-on labs follow the official workshop blocks

Who should be here

Key roles named in the brief

- Technical sales and pre-sales engineers
- Business consultants shaping customer outcomes
- Delivery consultants preparing engagements

Update **confidential** designator here

Prerequisites

So you get the most from the labs

- OpenShift fundamentals (DO180 level)
- Basic awareness of OpenShift Virtualization
- Working knowledge of VMware environments

From the official agenda brief

Workshop goal

What we are building confidence in

- Secure customer commitment to a Virtualization Migration Assessment
- Understand the existing customer environment deeply
- Assess migration risk with credible evidence
- Run an assessment motion as a partner on the customer side

Proposed outcomes

Condensed from the brief

- Qualify and position VMA opportunities with clarity
- Handle competitive business and technical objections
- Know when to engage ecosystem partners for delivery
- Perform upfront technical discovery and risk framing
- Scope a meaningful OpenShift Virtualization proof of concept

Agenda snapshot · Day 1

Major blocks (times as in the brief)

- Welcome, sales motion, OpenShift Virt overview
- Storage and networking deep dives
- MTV bridge, migration factory, VDI on OpenShift Virt
- Lab introduction then extended hands-on lab time

Planned instructional time ~255 minutes

Agenda snapshot · Day 2

Analysis, diagnostics, wrap-up

- VMware environment analysis and risk estimation
- OpenShift Migration Diagnostic and modernization blueprint
- Advanced Cluster Management and subscription guidance
- Structured wrap-up and workshop close

Planned instructional time ~265 minutes

Thank you
